Case Study

Viscotaq® Viscous Elastic Wrapping(Viscowrap HT, PVC composite wrap) on Elbow

Viscotaq® Viscous Elastic Wrapping (Viscowrap HT, PVC composite wrap) on Elbow

Surface Preparation

Elbow suffered severe external corrosion.
Surface preparation up to St2

2 Viscotaq® Viscowrap Application

Viscotaq® Viscowrap HT is applied by removing the release liner and placing adhesive side on the pipe. Initial wrap should be a straight circumference wrap. Once initial straight circumference wrap is completed, wrap with slight tension and a minimum 1/2" overlap.

3 Viscotaq® PVC Outerwrap Application
Outer Wrap should be wrapped with tension
and a minimum of 50 % overlap. First wrap
and termination wrap should be a straight

circumference wrap

4 Design Criteria

Operating Pressure : 60 Bar

Temperature : Ambient

Defect Type : External corrosion

Pipeline : Elbow

Material : API 5L – X 60

Location : UAE
