

ZERUST® WORLD-CLASS SYSTEMS

ZERUST® offers a variety of corrosion management solutions for many applications, including work-in-progress, packaging, shipping, storage, and inventory.

VCI products contain vapor corrosion inhibitor substances that slowly release a corrosion preventative compound into sealed air space, effectively protecting exposed metal surfaces. VCI products are the best solution to rust problems.

Zerust® Rust Preventatives

Anti-corrosion oils, greases, and durable wax corrosion protection coatings are ideal for protecting bare-metal surfaces and parts/components of machinery and equipment in extreme weather and salt-air conditions.

Zerust® Oil Additives

Multiple formulations, designed to protect internal surfaces of engines and hydraulic systems against corrosion during lay-up and other shipping & storage applications to provide the best solution for your application.

Zerust® Cleaners, Additives, & Degreasers

Consisting of low-to-very low foaming, mildly alkaline, or near neutral, aqueous-based cleaner inhibitor products that effectively remove light-to-medium hydrocarbon soils while also offering short-term rust protection.

Zerust® Rust & Tarnish Removers Powerful

and safe solutions for the removal of severe rust, rework, and recovery of metal items. Offers a range of techs, from pH neutral products to more aggressive products inhibiting flash corrosion on cleaned surfaces.

Zerust® ICT® Vapor Corrosion Inhibitors (VCIs) Diffusers & Emitters

Portable products that diffuse VCIs chemicals to protect metals within enclosures, providing targeted corrosion protection in hard-to-reach enclosed spaces or can be used as added protection to Zerust® VCI packaging products. They are **"safe for electronics"**, odorless, non-toxic, and residue-free.
