

**Viscotag Viscous Elastic Wrapping
(Viscowrap HT and PVC Outerwrap)
on Pig Indicator**

Viscotag Viscous Elastic Wrapping (Viscowrap HT and PVC Outerwrap)

1 Surface Preparation

Pipeline suffered severe external corrosion. Surface preparation up to St2

2 Viscotag® Viscowrap Application

Viscotag® Viscowrap HT is applied by removing the release liner and placing adhesive side on the pipe. Initial wrap should be a straight circumference wrap. Once initial straight circumference wrap is completed, wrap with slight tension and a minimum 1/2" overlap.

3 Viscotag® PVC Outerwrap Application

Outer Wrap should be wrapped with tension and a minimum of 50 % overlap. First wrap and termination wrap should be a straight circumference wrap

4 Design Criteria

Operating Pressure	: 60 Bar
Temperature	: Ambient
Defect Type	: External corrosion
Object	: Pig Indicator
Material	: API 5L – X 60
Location	: UAE
